COMPLEXITY

EQUIPMENT

Cones
Balls
Bibs / Pinnies

- Split class into two even teams or 4 teams to keep numbers lower
- Give each student in each team a number e.g 1-8
- The teacher calls out a number and each student with that number races out and collects a ball and tries to score before the other teams.
- The student who scores first scores a point for their team and all players head back to their line

MODIFY IT

- To make it more challenging call 2-3 numbers at a time and players must transport the ball via pass only (no dribbling)
